We Get it. You want a drying towel that feels substantial and absorbs everything it touches. A simple ask, but you know that The Rag Company had to put their own TWIST on things! Introducing the Liquid8r Drying Towel from The Rag Company. This Twist Loop Drying Towel has the “flop” and satisfying weight that many people love in drying towels (1100gsm!). Featuring a Premium 70/30 Blend and hemmed “hidden” edge, this large 63cm x 91cm towel is tough on water but SOFT on paint! The idea behind the Liquid8r was to create an affordable Premium microfibre (aka microfiber) Drying Towel that could be appreciated by Car Enthusiasts and Professionals everywhere! Compared to our other Premium Drying Towels, the Liquid8r features a longer “loop” design and introduces a unique colour to our TRC drying towel lineup. Everyone has a preference when it comes to drying towels, but the Liquid8r is our recommendation for anyone new to Microfibre Drying towels. You got water? Let the Liquid8r make it DISAPPEAR!

Please Note: Due to the longer closed loop structure of the Liquid8r, a single loop may occasionally expose while drying. Simply take a pair of scissors and snip the thread to return the towel to new. Due to the unique tight weave design, there is no reason for any concerns about unraveling. We recommend washing the towels after every use to preserve the absorption and soft feel.

**Tips** - The best way to care for your microfibre towels
