

Koch Chemie Nms Nano Magic Shampoo 10L

77702010

Unchallenged high-tech shampoo to thorough gloss cleaning and long-term protection in a single step. Previously applied waxes and seals are preserved. The unique combination of care components leaves behind a long-lasting protective and water-repellent nano-layer.

Recommendations of Use

Add about 50 ml of shampoo (5 capfuls) to 10 l of warm water. Clean the vehicle with a wash pad. Then rinse off with a soft water jet and wipe any remaining water off with a cloth. Drying is made easier through the use of AllroundQuickShine and the gloss effect is optimised even further.
